# Cleaning the Hood Filters onsite?

## Attention Facility Manager:

EPA's "Clean Water Act" has made it impossible for us to service your grease filters onsite and in the parking lots.

We want to educate your location on the risks that are involved with cleaning filters onsite.

Besides the most common outcome of a large **costly fine**, there is also a chance of a **1 year jail term** based off of the severity of the offence.

Here at FilterShine, our goal is to insure that we are not only **protecting** our customers from exposure and liabilities like these, but also we too are committed to our employees and insuring that they are not being put at risk of **breaking a law**

This is why we offer our Grease Filter Exchange Services. Not only will your staff not have to service your filters in-house any longer, the service itself will save you enough money in labor where it **pays for itself!**

We thank you for your time and concern in this matter, and also look forward to having a conversation about our services. Please feel free to contact us at **1-855-483-0199** today.

Stephen Kassaras

FilterShine New England, General Manager/Partner

## Hidden risks of cleaning filters in your deep sinks.

- Clogged drains
- Costly line jetting services
- Local fines due to pH levels of your waste
- Chemical burns for employees

## Did you know that up to 70% of the grease going down your drains are from cleaning your hood filters in your sinks?

- Lessen your chemical costs
- Lessen your grease trap service costs
- Lessen your employee cost

## Increase employee morale while minimizing injury exposures.

- No more climbing on cooking equipment
- No more cutting your fingers on the baffles
- Employees are happier

## Did you know that our services are a tax write off?

- Paying employees to clean your filters, you have to pay the payroll tax
- Using our service is a tax deductible expense

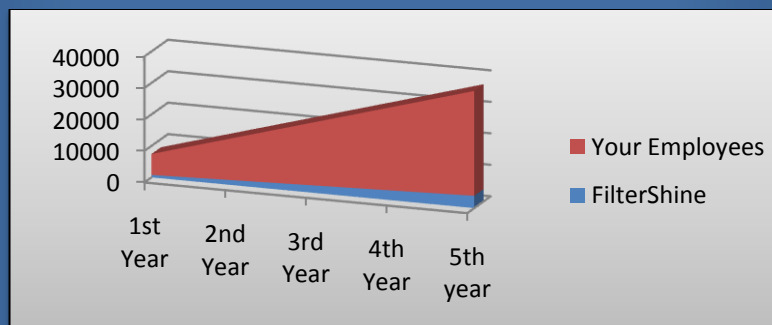

# Grease Filter Services

## Grease Filter Exchange Service

- **Improve Air Flow**  
By having your filters maintained by a professional company that uses all the same style of filters and removes all of the grease from with-in them
- **COST EFFECTIVE**  
Weekly, Bi-weekly, Monthly, and Bi-monthly services.. Lowering your energy and chemical bill, while eliminating your employees cost
- **Professional**  
Our uniformed staff will be in and out of your facility in just minutes. Leaving no mess behind! No filters are cleaned on site
- **NATIONAL SERVICES**  
Opening new locations across the United States

FilterShine New England prides itself on our professionalism and customer service. View our client chart below to see where our company will save your facility money

The cost for your employees to service your filters is much higher for these reasons:

1. Hourly Wages
2. Chemical
3. Electricity
4. Waste Water
5. New Filters when one breaks
6. Liability to your facility
7. Frequency of cleaning much higher to maintain the filters

Chart is based on an average account with 10 filters being serviced every 4 weeks vs. employee cleaning every other night in normal closing procedures

## Storm Water Runoff Rule

Storm Water Pollution Prevention Plan, this helps you comply with 40 CFR 122.26 (1998), preventing illegal storm drain pollution and unwanted EPA fines.

## Safe Storm Water Act

2010 Law gets changed to increase EPA's role in enforcement

## Safe Storm Water Act Penalties

- EPA's CID (Criminal Investigation Division)
  - Increasing size dramatically... more inspection agents
  - New Mission: Go after smaller violators
    - Fines (from the service technician to everyone involved)
    - Confiscate property
    - Jail time
- Clean Water is our most valuable natural resource
- Restaurants represent high inputs of FOGs to municipal waste water systems or septic fields

## Why is FilterShine “Green”?

- Volume Cleaning of Filters Saves Energy
- Soak tank constructed - recycles waste water
- No FOG (fats, oils, grease) in the storm system
- No EPA Fines or clean up costs
- Thorough cleaning of grease from the filter
  - vs. the “surface cleaning” that is currently done on site with pressure washing
  - Serious fire hazard removed from grease buildup in the Filters

## Going “Green”

### Why will Customers Choose FilterShine?

- No filter maintenance expenses for customer
  - Lifetime Repair & Replace program
  - Reduces kitchen staff exposure to injury from getting on equipment to take down filters
  - Eliminates costly expense of having kitchen staff clean filters - improves air quality for staff
  - Improves exhaust system efficiency so that the filters function to remove grease from airflow
  - Filters meet all NFPA requirements
